Work Different

Macintosh Business Consultants Since 1993

We are a consulting company with a special focus as a center of expertise for small and medium size businesses in the use of Apple technology. We help develop plans that support your business objectives, bringing the resources to implement those plans.

Personal Coaching for You and Your Staff

You work hard every day ... so why not employ your Mac Apps to do the same!

We offer Personalized Coaching Services to teach you and your team how to get the most out of your Mac and your Macintosh Business Applications. Our goal is to provide you with personal coaching designed for your work environment and specific applications so the end result is better productivity.

Your Trusted Source For Macintosh Computer Repairs And Maintenance
Under warranty or out of warranty, our Apple Certified Technicians will evaluate, diagnose and repair your Mac and iPad. We are also available for maintenance concerns including upgrades, memory and hard drive installations, data migrations, back-up storage, networking solutions and troubleshooting.

Mac

Certified FileMaker Consulting and Development

Filemaker brings simplicity to your organization! This database management solution combines cross-platform architecture and business logic to produce a system that gives users and workgroups a fast and simple approach to organizing their job functions.

We offer certified customization that allows for unlimited modifications and flexibility making every management task easier than ever before!

FileMaker Go

Mobile Databases for iPad and iPhone

These days, doing more on the go is critical - whether it's working with your team more efficiently or managing your personal tasks. FileMaker Go can be used to tackle any task for your business or professional life. Collaborate with team members and integrate with external data sources while utilizing industry-standard security.

Retail Enlightenment

Lightspeed is the complete Point of Sale solution for iGeneration retailers, offering powerful multi-user, multi-store work flows on Mac, iPad, Mobile and eCommerce. Manage the buyer experience and the back-office from a common platform.

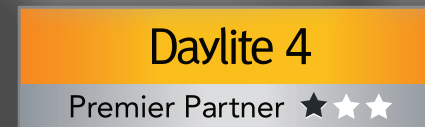

Daylite keeps everything related to your business in one place.

This makes it easy to find things, easy to add new things, and easy for everyone you work with to be on the same page.

Know what's on your plate.

Daylite's home screen allows you to quickly see your schedule for today as well as any tasks due today. Or glance at the tasks you've added to your Worklist. Know what's on the horizon.

Easily see tasks or projects that have due dates, or sales opportunities forecasted to close in the upcoming week.

Quickly Deploy and Support Mobile Devices in the Enterprise

IT organizations today need visibility into and control over the mobile devices that are entering the enterprise, whether they are employee owned or provided by the corporation.

Macs At Work's has partnered with MaaS360 to provide the ultimate service in cloud-based Mobile Device Management for our clients. This mobility management platform includes a comprehensive set of capabilities so you can quickly and easily configure devices for enterprise access and ensure that the corporate data stored on all devices is secure.

Simplify IT infrastructure and operations management from a single portal to monitor a variety of mobile devices and operating systems, including Apple iOS, Android, Windows Phone, and BlackBerry.
