

## The Complete Retail Solution

LightSpeed offers a powerful range of Sales Workflows in a complete retail solution for iGeneration retailers: innovative front-counter POS and back-office management on Mac, interactive selling on iPad and Mobile, tightly integrated eCommerce with scalable server technology that is natively multi-user and multi-store.

The right software, the right hardware

LightSpeed fully integrates with barcode scanners, credit card swipes, payment terminals, pole displays, receipt printers, label printers, and cash drawers.

## LightSpeed for Mac

*Completely Retail - Totally Mac*

LightSpeed's streamlined interface gives a clear overview of your single or multi-store operations, saving you time and giving you absolute control over your business.

With a back-office Browser that simplifies purchasing and inventory management, a touchscreen-optimized POS for fast front-counter sales, and tightly integrated eCommerce solutions for selling online.

## LightSpeed eCommerce

*Grow Online*

LightSpeed eCommerce is a connector that uploads your products and images to the online store of your choice and downloads your orders back into LightSpeed, offering a solution that is fully integrated with your invoicing and fulfillment workflows.

## LightSpeed for iPad

*Show And Sell*

LightSpeed for iPad brings the LightSpeed Point of Sale experience to Apple's acclaimed tablet platform, allowing retailers to showcase their products with Show & Tell and process transactions anywhere. LightSpeed for iPad is retail's first interactive point of sale system, combining next-level personalized selling with inventory scanning, wireless payments and the powerful retail workflows of LightSpeed.

Have the freedom to create new invoices, enter customer information, process gift cards, and perform inventory lookups at your front counter, on your showroom floor or even beyond your store at a sales event. Process payments anywhere the iPad takes you, accept signatures on-screen, and email or wirelessly print receipts.

## Mobilize Your Store

*Scan and Swipe*

Process sales anywhere in the store - or beyond at trade shows, conferences or other locations. LightSpeed Mobile offers a true advantage over competitors with an alternative to traditional POS systems and long, impersonal line-ups at the register.

Professional Services  
For LightSpeed Data  
Management

As a Certified LightSpeed POS Reseller, **Macs At Work** offers Professional Services to our LightSpeed Retail Customers which includes set up, training and troubleshooting.

The initial set up includes the importing of data using a propriety data tool that assists in creating files for vendors, customer, families, classes, chart of accounts, and product files. Export files are audited to ensure that LightSpeed will be able to process them correctly.

We also offer customized user training to you and your staff. Continuous support is also available through the LightSpeed online user guide, instructional videos, and webinars.

## Extend LightSpeed Support

*Purchase a Maintenance Plan*

To continue to receive support and upgrades after the initial 30 day period LightSpeed includes with every new purchase, LightSpeed offers a 12 Month Maintenance Plan which includes Free LightSpeed Upgrades, Phone Support, Remote Database Support, and Emergency Support Hours.
